## PROFILE

I'm a results-driven Full Stack Developer passionate about building scalable, high-performance applications. With expertise in modern JavaScript frameworks, backend architectures, and real-time data systems, I thrive on solving complex problems efficiently. Constantly exploring new technologies, I aim to push the boundaries of innovation and deliver impactful digital experiences..

## EDUCATION

### Masters of Business Administration

Parul University  
July 2024 - Present

### Bachelor of Science in Information Technology

Sarvajanik University  
2021 - 2024  
CGPA - 8.45

## TECHNICAL EXPERIENCE

### Dot3 Solutions

React.js Intern Dec 2023 - Jun 2024  
Developed an Accounting Management System, focusing on UI components, state management, and API integrations

### Dot3 Solutions

FullStack Developer Jun 2024 - Present  
Built and optimized scalable web applications, working on both frontend (React, Next.js) and backend (Node.js, NestJS). Gained experience in real-time data systems.

## PROJECTS

### Accounting Management System

An accounting solution for managing invoices, product stock, returns, and payments. Designed to track and report on sales, stock levels, and financial data.

### Import Management System

A platform for tracking purchase, import, and sales data, helping to manage inventory and ledger for international shipments, including dead and return stock.

### Garment Costing Calculator

A tool for garment manufacturers to calculate production costs, manage materials, and generate cost estimates for clients. Helps optimize ordering and inventory.

### Clinic Management System

A healthcare solution with WhatsApp-based appointment booking, patient records, billing automation, and doctor scheduling. Built with React, NestJS, Prisma, Redis.

### Real-Time Stock Market Analytics

A data-driven trading platform displaying live stock market data (F&O, OHLC, IV) and finding the best trades based on custom strategies.

## KEY COMPETENCIES

**Frontend Development** - React, Next.js, Vite, ShadCN, MUI, Tailwind, Responsive UI

**Backend Development** – Node.js, NestJS, Express, REST APIs, WebSockets

**Database & Storage** – MongoDB, MySQL, Redis, Prisma

**Dev Tools & Workflow** – Git, Docker, Kafka, Webhooks

**Real-Time & Scalable Systems** – WebSockets, Redis

**Problem-Solving & Optimization** – Performance tuning, Clean code, Scalable architecture

**Domain Expertise** – AI-driven tools, Real-time data applications
