PROFILE

I'm a results-driven Full Stack Developer with expertise in scalable applications, real-time systems, and modern JavaScript frameworks. Beyond my professional role at Dot3 Solutions, I've also worked on Shopify store development and built personalized eCommerce management platforms, helping businesses streamline operations and grow online. Constantly exploring new technologies, I thrive on solving complex problems and delivering impactful digital solutions.

EDUCATION

Masters of Business Administration
Parul University

July 2024 - Present

Bachelor of Science in Information Technology
Sarvajanik University
CGPA - 8.45

2021 - 2024

PROFESSIONAL EXPERIENCE

Independent / Freelance Projects

May 2025 – Sep 2025

Full Stack & Shopify Developer

- Designed and developed custom Shopify stores, optimizing themes, payment flows, and user experience.
- Built a personalized eCommerce business management web application with order tracking, inventory, and automated customer notifications.
- Integrated Shopify APIs with backend systems for real-time order and product sync.
- Helped small businesses digitize workflows, reduce manual effort, and scale online presence.

Dot3 Solutions

Jun 2024 - April 2025

FullStack Developer

Built and optimized scalable web applications, working on both frontend (React, Next.js) and backend (Node.js, NestJS). Gained experience in real-time data systems.

Dot3 Solutions

Dec 2023 - Jun 2024

React.js Intern

Developed an Accounting Management System, focusing on UI components, state management, and API integrations

KEY COMPETENCIES

Frontend Development - React, Next.js, Vite, ShadCN, MUI, Tailwind, Responsive UI

Backend Development – Node.js, NestJS, Express, REST APIs

Database & Storage – MongoDB, MySQL, Prisma ORM

eCommerce Platforms – Shopify Store Development, Shopify API Integrations, Custom Business Management Apps

Dev Tools & Workflow – Git, Webhooks

Real-Time & Scalable Systems – WebSockets

PROJECTS

Accounting Management System

Designed and built an accounting management system for tracking expenses and incomes for individuals and companies. Features include a comprehensive dashboard and detailed financial tracking. Integrated React Hook Form, Tanstack Query, Zustand, Shadcn UI and charting libraries to deliver an interactive and efficient user experience

Import Business Management System

Developed an import business management system for Maxzope, encompassing features for ordering, container management, and warehouse operations. The system supports sales management, comprehensive reporting, and stock maintenance to streamline logistics and inventory control

Garment Costing Calculator

A specialized tool for garment manufacturers to calculate production costs, manage raw materials, and create accurate client estimates. It streamlines cost planning, inventory management, and order tracking to reduce waste and improve decision-making

Clinic Management System

A healthcare solution with WhatsApp-based appointment booking, patient record management and doctor scheduling. Built with React, NestJS, Prisma, and Redis for smooth performance and real-time functionality.

Real-Time Stock Market Analytics

A data-driven trading platform that displays live stock market data, including Futures & Options (F&O), OHLC charts, and Implied Volatility (IV), while helping users identify optimal trades based on customizable strategies. Designed to support informed decision-making through real-time analytics and strategy-driven trade discovery.

Ecommerce Order Management System

Developed a fully automated eCommerce order management system using React and Node.js, integrated with Shopify for seamless order imports. Implemented a 3-step follow-up confirmation flow, smart courier assignment, and complete tracking from pickup to delivery or return, with a clean and user-friendly UI.
